HDPE

and

LDPE

in the trash no more!

Brockton Film Plastics Recycling Pilot Project

#2 HDPE and #4 LDPE film plastics make up a large portion of the household waste we send to our landfills.

To reduce your use of these plastics, avoid purchasing what cannot be recycled in Brockton:

- ✓ Bring your own container for bulk or take-out foods
- ✓ Encourage food producers, manufacturers and retailers to switch to reusable, recyclable or compostable alternatives

How to Recycle Your Film Plastics:

Step 1 Make sure all film plastic is:

Clean - remove all food residue **Dry** - if you rinse it, let it dry **Empty** - remove paper, stickers, receipts

Step 2 **Tie in a Bag** Collect film plastics in an accepted grocery or retail bag and tie tightly.
No loose plastics please.

Step 3 Place filled bags in the small round opening in the yellow bin at one of the following locations:

Brockton Landfill Sites During regular operating hours www.Brockton.ca/LandfillSites
24 Hour Walkerton Recycling Depot - 320 Kincardine Highway
